Comments:

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The UAA was conducted in June, 2005 and no WBCR was observed. The stream did not meet the maximum or average depth criterion in any of the 2 sites evaluated. The stream was very shallow and was dry at one site. No interviews were conducted. Because of the overall shallow depth of the stream, the committee recommends removing the WBCR designation.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive
